

Item 8.01. Other Events.

In accordance with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, Tidewater Inc. (the “Company”) notes that certain statements set forth in this Current Report on Form 8-K provide other than historical information and are forward looking. The actual achievement of any forecasted results, or the unfolding of future economic or business developments in a way anticipated or projected by the Company, involve numerous risks and uncertainties that may cause the Company’s actual performance to be materially different from that stated or implied in the forward-looking statement. Among those risks and uncertainties, many of which are beyond the control of the Company, include, without limitation, the risk that the cost savings and any other synergies from the business combination with GulfMark Offshore, Inc. (the “business combination”) may not be fully realized or may take longer to realize than expected; disruptions from the business combination making it more difficult to maintain relationships with customers, employees or suppliers; the possibility of litigation related to the business combination; the diversion of management’s time from day-to-day operations due to the business combination; incurrence of substantial transaction-related costs associated with the business combination; the possibility of unanticipated costs being incurred to effectuate the integration; new accounting policies and our consolidation activities; fluctuations in worldwide energy demand and oil and natural gas prices, and continuing depressed levels of oil and natural gas prices without a clear indication of if, or when, prices will recover to a level to support renewed offshore exploration activities; fleet additions by competitors and industry overcapacity; our limited capital resources available to replenish our asset base, including through acquisitions or vessel construction, and to fund our capital expenditure needs; uncertainty of global financial market conditions and potential constraints in accessing capital or credit if and when needed with favorable terms, if at all; changes in decisions and capital spending by customers in the energy industry and the industry expectations for offshore exploration, field development and production; consolidation of our customer base; loss of a major customer; changing customer demands for vessel specifications, which may make some of our older vessels technologically obsolete for certain customer projects or in certain markets; rapid technological changes; delays and other problems associated with vessel construction and maintenance; the continued availability of qualified personnel and our ability to attract and retain them; the operating risks normally incident to our lines of business, including the potential impact of liquidated counterparties; our ability to comply with covenants in our indentures and other debt instruments; acts of terrorism and piracy; the impact of potential information technology, cybersecurity or data security breaches; integration of acquired businesses and entry into new lines of business; disagreements with our joint venture partners; significant weather conditions; unsettled political conditions, war, civil unrest and governmental actions, such as expropriation or enforcement of customs or other laws that are not well developed or consistently enforced; the risks associated with our international operations, including local content, local currency or similar requirements especially in higher political risk countries where we operate; interest rate and foreign currency fluctuations; labor changes proposed by international conventions; increased regulatory burdens and oversight; changes in laws governing the taxation of foreign source income; retention of skilled workers; enforcement of laws related to the environment, labor and foreign corrupt practices; the effects of asserted and unasserted claims and the extent of available insurance coverage; and the resolution of pending legal proceedings.

On February 7, 2019, the Company issued a press release announcing John T. Rynd, President and Chief Executive Officer and Director, Quintin V. Kneen, Chief Financial Officer, and Jason R. Stanley, Director, Investor Relations, will present at the Credit Suisse 24th Annual Energy Summit in Vail, Colorado on Tuesday, February 12, 2019, at approximately 8:40 a.m. Mountain Time. Upon completion of the presentation, the Company will also file a Form 8-K with the SEC, which will include a transcript of the presentation and a copy of the slides used by the presenter.

The press release is furnished as Exhibit 99.1 to this Current Report and is incorporated herein by reference as if fully set forth under this item.

Item 9.01. Financial Statements and Exhibits.
